

NVQ Level 3 Diploma in Roofing Occupations

Course Aim

To provide recognition of skills and knowledge on a range of responsibilities associated with roofing occupations, including installations, outstripping and reclamation.

NVQ Level 3 delegates are often also involved in decision making, quality checks and work planning. It is not expected that delegates working in this industry all do the same activities or use the same equipment and machinery, so the qualification has been developed to make it as widely available as possible by having 3 distinct pathways. All work completed must be carried out in accordance with Building Regulations and Industry recognised safe working practices, including the disposal of waste. The qualification is structured to ensure that there is a high degree of flexibility within the pathways and units available and will allow employees from companies of all sizes and specialisms equal opportunity to complete.

Who Should Attend?

The NVQ Level 3 Diploma in Roofing Occupations is aimed at those who are involved in Roofing, more specifically installing roof tiles, slates or both. The qualification is at level 3 although there may be some units at different levels. NVQ Level 3 qualifications are primarily aimed at those who are fully trained and experienced in a wide range of installation types including mitred, vertical, roofs with diminishing margins, curved/ swept roofs and installations that involve non-routine or complex work. Delegates must also carry outstripping and reclamation of roof coverings.

Agenda

- Introduction to the qualification, usually taking place at an external centre – this will include paperwork for sign-up and registering with the awarding body.
- Delegates will be provided with Knowledge Packs that they may complete in their own time; identifying the delegate's current knowledge and skill set.
- Following Completion of the Knowledge Packs, the Practical Observation will begin. This will be on the learner's site, and may include visits from your assessor who will observe you working and offer support. Delegates may also be asked to record observations on camera for review by the assessor, on practical elements such as pre-shift and operation checks on the machinery.
- There will then be a collection of Witness Testimonies (from site Supervisor's / Manager's etc.) and Additional Evidence by the assessor.
- Finally, a one-to-one Professional Discussion will take place between the assessor and the delegate.

Certification

After Assessment, the assessor will cross-match all evidence collected with the awarding body standards and sign-off the delegate, if all standards have been met. IQA will quality check the delegate's portfolio.

Completion of Level 3 NVQ Diploma in Roofing Occupations will allow you to apply for Gold Trade CSCS Card.

Safety / Value / Availability / Support

NVQ Level 3 Diploma in Roofing Occupations

Mandatory Units

- A/508/0238 Confirming Work Activities and Resources for an Occupational Work Area in the Workplace
- K/507/9537 Developing and Maintaining Good Occupational Working Relationships in the Workplace
- F/508/0239 Confirming the Occupational Method of Work in the Workplace
- A/507/9560 Conforming to General Health, Safety and Welfare in the Workplace

Pathway 2 - Roof Slater and Tiler

Mandatory Units

- D/508/0247 Installing underlay, battens and roofing components in the workplace
- Y/508/0246 Stripping and reclaiming roof coverings in the workplace
- H/508/0248 Installing pre-formed weathering flashings to roofs in the workplace
- M/508/0253 Installing single-lap roof tiles to a variable gauge in the workplace
- K/508/0252 Installing plain Tile roof coverings in the workplace
- K/508/0249 Installing double-lap artificial roof slates in the workplace
- D/508/0250 Installing natural roof slate to mitred and vertical roof details in the workplace
- H/508/0251 Installing random natural roof slates with diminishing margins in the workplace

Pathway 1 - Roof Slater

Mandatory Units

- D/508/0247 Installing underlay, battens and roofing components in the workplace
- H/508/0248 Installing pre-formed weathering flashings to roofs in the workplace
- K/508/0249 Installing double-lap artificial roof slates in the workplace
- D/508/0250 Installing natural roof slate to mitred and vertical roof details in the workplace
- H/508/0251 Installing random natural roof slates with diminishing margins in the workplace
- Y/508/0246 Stripping and reclaiming roof coverings in the workplace

Pathway 3 - Roof Tiler

Mandatory Units

- D/508/0247 Installing underlay, battens and roofing components in the workplace
- H/508/0248 Installing pre-formed weathering flashings to roofs in the workplace
- Y/508/0246 Stripping and reclaiming roof coverings in the workplace
- R/508/0245 Installing single-lap roof tiles to a fixed gauge
- T/508/0254 Installing double-lap roof tiles to curved and swept roof details in the workplace
- J/508/0257 Installing single and double lap roof tiles to mitred and vertical roof details in the workplace
