

Pesticide Application: Granular Application (PA4) - LANTRA

Course Aim

This course aims to provide the knowledge and skills to effectively handle, apply, and store pesticides using mounted/trailer granular applicators. Pesticides are widely used in agriculture and horticulture, but they can be potentially harmful substances, so a thorough appreciation of safe working practices is vital.

This is a hands-on course that includes both theory and practical elements which supply sufficient training to comply with pesticide regulations.

Who Should Attend?

Anyone with an interest or employment in agriculture, forestry, or horticulture who currently uses or wishes to use mounted/trailer granular applicators. Due to the nature of the training a minimum level of fitness will be required for specific operations. Whilst we would not want to disadvantage you as a learner, it is an essential requirement.

To be eligible to attend this course, you must have successfully completed a safe use of pesticides course and be able to proficiently operate and drive the vehicle(s) used during training.

Course Duration

This is a 1 day course.

Maximum Delegates

Maximum attendees: 6 delegates.

Agenda

By the end of this course, you'll be able to:

- Identify and describe how granular applicators work.
- Prepare and set up granular applicators.
- Choose and use the correct type of applicator for a given product and situation.
- Set and check the application rate for an application.
- Fill the applicator accurately and safely.
- Operate the applicator safely and efficiently.
- Decontaminate the machinery safely.
- Service the machinery.
- Select the correct PPE when using granules.
- Clean and store machinery correctly.
- Accurately record information.

Certification

Upon completion of this course, delegates will receive a LANTRA accredited certificate that does not expire. However, it is advised and is business best practice that delegates attend a refresher course every 5 years.
