

PASMA - Combi - Mobile Access Tower and Low Level Access E-Learning

Course Aim

PASMA Combined Low-Level Access and Towers for Users will equip you with the specialist knowledge you need to work safely with mobile access towers and low-level access equipment such as podiums.

Completing the e-learning alone does not qualify you for a PASMA card; Delegates can complete the theory session while they're safe at home and book their practical session in further down the line.

This minimises face-to-face contact between instructors and delegates and also means you can skip the morning in the classroom and go straight to the assessment and practical.

The e-learning can be done from home using a phone, tablet or desktop computer on any modern internet browser. It consists of a series of videos and knowledge checks the delegate can work through at their own pace. It is delivered by an experienced instructor and covers everything they'd normally learn in a classroom environment.

At the end of the course there's a quick form to complete. Then, they receive a copy of their online training verification certificate. This needs to be brought with them to our training centre – the form can either be printed or shown using their phone.

Once they have completed the e-learning, they must also complete the theory test and practical assessment at one of our HSS Training PASMA-Approved centres to obtain a PASMA Card.

Agenda

This course covers the theory only associated with the below topics. Delegates are required to attend an HSS Training PASMA-approved training centre within 90 days of completing the e-learning module to sit their theory exam and undertake practical training and assessment.

- Current Legislation
- Regulations and guidance affecting working from low level access units and standard mobile access towers
- PASMA Code of Practice
- PAS250 (Publicly Available Specification)
- Assembling, altering and dismantling
- Current best practice for fall protection
- Inspection of low level and standard mobile access towers
- Tower inspection records
- Hazards affecting the use of units & platforms
- Written assessment
- Practical training and assessment

PASMA - Combi - Mobile Access Tower and Low Level Access E-Learning

Who Should Attend?

Those who need to erect, dismantle and inspect mobile access towers and low level access equipment safely.

Since the assembly and use of mobile towers can be physically demanding, users should be physically fit, in good health and should, generally, not have problems with eyesight or hearing, heart disease, high blood pressure, epilepsy, fear of heights / vertigo, giddiness / difficulty with balance, impaired limb function, alcohol or drug dependence or psychiatric illness.

Course Duration

This is a 4 hour course.

Certification

Delegates successfully completing the course will receive a PASMA Certification and ID Card (valid for 5 years).
