

City & Guilds - Authorised Person - Low Voltage Healthcare Refresher

Course Aim

The aim of this course is to provide hospital engineers and technicians with the knowledge and understanding to refresh their understanding of the requirements of statutory regulation/legislation relating to statutory Safety Regulations (EAWR 89) and procedures under HTM 06-02.

This course equips delegates with the understanding of safe systems of work and how to apply EAWR to Low voltage installations.

This course is designed to refresh the knowledge of the initial City & Guilds - Authorised Person – Low Voltage Healthcare course.

Who Should Attend?

This course is aimed at delegates who are currently practicing as low voltage authorised persons and have been nominated for re-appointment as authorised person electrical with respect to LV distribution and installations, or supervising work on LV installations.

This course is primarily for hospital engineers and technicians involved in the supervision of electrical services and the application of HTM 06-02 to these systems.
