

ISO 14001:2015

Internal Auditor (2354) CQI and IRCA

Course Aim

The aim of this course is to provide the knowledge and understanding required to conduct effective environmental audits. This course aims to allow delegates to plan, evaluate and report the results found of internal environmental audits, as well as help delegates gain an understanding of the role of internal auditor. This training also aims to provide an understanding of the key attributes of having an efficient and effective environmental management system.

It introduces delegates to business environmental issues and relevant legislative issues. The course is based on auditing with the ISO 14001:2015 standard.

Who Should Attend?

This course is aimed at delegates who will undertake internal environmental audits as part of their working job role and who will be required to manage and implement internal audit programmes.

Other delegates who may find this course useful are team leaders and supervisors with EMS, who are looking to broaden their awareness of environmental issues in order to understand how they can improve their overall contribution to the success of the business.

The course does not require any past auditing or environmental management system experience.

Agenda

- Basic environmental thinking and risk-based concepts
- Structure and principles of an environmental management system
- Overview of key ISO 14001:2015 requirements
- Auditors roles and responsibilities
- Types of environmental audit
- Effective auditing techniques and good audit practices
- Reporting valid findings and managing corrective actions

Certification

Delegates successfully completing the course will receive a CQI and IRCA Certified training certificate (2354).

Course Duration

This is a 2 day course.
