

# Ladder and Stepladder User - Ladder Association (E-Learning)

## Course Aim

To provide delegates with the knowledge required to work safely with ladders and step ladders in the course of their daily duties.

### NOTE

Completing the e-learning alone does not qualify you as a ladder user; industry standards require both the knowledge gained in the e-learning theory session and assessed use of the equipment to demonstrate proficiency. Once you have completed the e-learning, you must also complete the practical assessment and testing at a Ladder Association approved HSS Training centre. On successful achievement, of all three parts, we will apply for your Ladder Association Certification and ID Card.

## Agenda

The e-learning module is a series of videos covering the same content as the normal classroom based Ladder Association Users course.

- Aims and Objectives
- Information
- Roles and Responsibilities
- Equipment
- Site, Task, Equipment, People (STEP)
- Storage, Transport, Maintenance
- Hazards
- Assessments

## Who Should Attend?

Operatives and supervisors who require the knowledge and practical skills to work safely with ladders and stepladders.

This e-learning module is ideal for those individuals who do not want time away from their job / workplace.

## Course Duration

This is a 1 day course.

## Certification

Successful completion of this course will result in the issuing of a Ladder Association Ladder User's ID card and Certificate of Training valid for 5 years.
