

IPAF Operator (E-Learning)

Course Aim

This industry leading IPAF e-learning module provides delegates with a thorough and comprehensive knowledge of the MEWPs they work with.

IPAF's enhanced e-learning module is part of its full training programme for mobile elevating work platforms (MEWPs). The training has been created to allow delegates to gain and develop the required knowledge outside of the classroom.

Completing the e-learning alone does not qualify you as an operator; industry standards require both the knowledge gained in the e-learning theory session and assessed operation of the equipment to demonstrate proficiency. Once you have completed the e-learning, you must also complete the practical assessment and testing at one of our HSS Training IPAF-Approved centres to obtain a PAL Card (Powered Access Licensed-Registration).

Who Should Attend?

Those who operate, supervise or manage the use of powered access equipment including scissor lifts (3a) and self-propelled boom lifts (3b).

This e-learning module is ideal for those individuals who do not want time away from their job / workplace.

This course is also available as a full-day tutor led IPAF (Dual) Operator course.

Course Duration

This is a 4-hour course.

Certification

To complete the e-learning theory module, delegates must pass a practice theory test which will verify that the delegate has the required knowledge and is thoroughly prepared to move onto the theory exam and practical training and assessment.

Having passed the randomised 30 question practice test, delegates will be issued with a receipt to verify that they have completed the online training module. Delegates will then need to contact HSS Training to sit their theory exam and undertake practical training and assessment in one of our training centres within 45 days of completing the e-learning module. This is a half day face to face session with practical training and assessment on both machines.

To find the next available date at a centre near you, please contact us on 0345 605 0006 or email training@hss.com.

All delegates will still be expected to complete a theory test when they arrive at a training centre to verify that they have the knowledge to continue to the practical element of the course. Delegates will be required to bring their e-learning completion receipt with them on the day.

Delegates successfully completing the theory and practical examinations will receive an IPAF Certificate and Powered Access Licence (PAL) Card valid for 5 years.

IPAF Operator (E-Learning)

Agenda

The e-learning module is highly interactive, with a wide variety of stimulating training methods including games, quizzes, videos and simulations -ensuring delegates gain all of the required knowledge to safely operate a MEWP.

The module is broken down into 7 study areas, and delegates understanding will be checked throughout with quizzes at the end of each study area.

Subjects covered will include MEWP regulations and guidance, machine types and use, structural parts, familiarisation and pre-use inspection, safe operating methods and hazards.

Practical

As the assembly and use of MEWPs can be physically demanding, users should be physically fit and in good health and should, generally, not have problems with eyesight or hearing, heart disease, high blood pressure, epilepsy, fear of heights/vertigo, giddiness/difficulty with balance, impaired limb function, alcohol or drug dependence or psychiatric illness.

The practical training and assessment at one of our IPAF-approved training centres will cover the following:

- Introduction to the machine and MEWP familiarisation
- Identification of major components
- Pre-use checks and inspection
- Starting / stopping the machine
- Pre-use function checks
- Checks prior to road travel

- Planning the route
- Travelling the route and manoeuvring the machine
- Setting the machine for work
- Basic operation
- Typical work applications
- Parking the machine

Additional Information

IPAF ePAL

HSS has been awarded an EcoVadis Gold rating, reaffirming our group commitment to sustainability and ethical business practices.

HSS Training are working hard to protect the environment whilst providing quality services to our customers. HSS are aware that the unnecessary printing of paper certificates may negatively impact your environmental aspirations and as well as our own.

For this reason all IPAF certifications are now digital as standard through IPAF Digital PAL Card Licence Application (ePAL); the cost of which is included within your course fee.

However, if it is imperative that you have a paper certificate this can be arranged at the additional cost of £40+VAT in order to cover the necessary costs for processing, printing and postage.
