

CPCS - A66 Compact Crane (Spider Crane)

Course Aim

The course aims to provide delegates with the knowledge and practical skills to safely operate a crane through theory and practical training.

Agenda

- Legislation - LOLER, PUWER, HASAWA
- Roles and responsibilities of personnel involved with lifting operations
- Documentation and certification for lifting equipment and lifting accessories
- Lifting accessories
- Types of accessories and use
- Slings techniques
- Down rating of accessories
- Sling angles
- Communications
- Establishing load weight and centre of gravity
- Proximity hazards
- Selecting lifting accessories
- Verifying documentation and certification
- Attaching accessories to different loads
- Signalling for the lifting, transferring, and positioning of loads
- Rigging the machine to manufactures specification
- Pre use inspections
- Daily inspections
- Theory Test
- Practical Test

Who Should Attend?

Delegates who are required to operate compact cranes with little or no compact crane experience.

PPE Requirements

- Hard hat
- Safety Footwear
- Hi-Visibility vest or jacket
- Gloves

Pre-requisites:

You must have a basic understanding and knowledge of current Health & Safety issues. The relevant CITB Health Safety & Environment touchscreen test must be current and in date (completed within the last 24 months).

Failure to arrive on the course with the relevant test completed and in date, will result in your not being permitted to undertake the exams at the end of the course. No refund will be given for exams cancelled as a result of you not having the relevant test completed.

More information can be found on the CITB website.

Your booking can only be confirmed once we receive the following information:

1. Existing CSCS Card Number
2. NI Number
3. D.O.B.

We will be in contact within 48 hours after you make your booking to collect further information prior to confirming your space on the course.

CPCS - A66 Compact Crane (Spider Crane)

Certification

This course will give delegates a CPCS Red Trained Operator card (on successful completion of CPCS technical tests).

Trained Operator Card (RED)

The Trained Operator Card confirms a level of core skills, knowledge, and understanding that can be applied in the workplace until measured as competent against national standards. Experienced and capable operators may hold a Trained Operator Card while working towards an SVQ or NVQ.

If you hold or have held a previous CPCS card and wish to progress, please let us know before booking.

Once you've obtained your Red CPCS Trained Operator Card, it is valid for 2 years. During this time, you are expected to complete an NVQ in Plant Operations to progress to a Blue CPCS Competence Card.

If you have not completed your NVQ within the 2-year period, the accreditation body, NOCN-CPCS, may allow a grace period provided you are registered and booked onto an NVQ course. For further guidance on eligibility and next steps, please contact our team.

Competent Operator Card (BLUE)

The Competent Operator Card confirms that the holder has demonstrated health and safety awareness (via the CITB Health, Safety, and Environment test), underpinning knowledge (via a CPCS theory test), operating ability (via a CPCS practical test), and operating competence on the type of plant (evidenced by an SVQ, NVQ, or employer confirmation of competence).

Course Duration

This is a 1 day course.
