

Environmental Sustainability Skills for Managers (ISEP) E- Learning

Course Aim

The aim of this course is to provide key insights for managers to understand important sustainability practices, which allows them to implement important changes within their organisations.

This course allows managers to improve sustainable working practices and develop awareness regarding sustainability practices within the workplace.

This course builds upon knowledge gained from the Sustainability Skills for the workforce course and helps develop skills in resource efficiency and evaluating environmental performance.

Who Should Attend?

This course is aimed at managers who are looking to learn effective environmental sustainability practices that they can apply to their role. The course has no formal entry requirements.

Course Duration

This is a 20 hour course.

Certification

Delegates successfully completing the course will receive an ISEP accredited certificate

Agenda

Delegates will have covered and developed a strong understanding of each of the following areas:

- Have knowledge and understanding of the main environmental and economic risks and opportunities
- Have knowledge and understanding of compliance obligations and business drivers for change
- Have knowledge and understanding of the main potential impacts on environment and sustainability
- Have knowledge and understanding of how to improve environmental performance
- Evaluate drivers for change and barriers
- Apply knowledge and understanding to baseline data to monitor and improve performance
- Apply knowledge of environmental sustainability across the value chain
- Demonstrate the importance of implementing resource efficiency
- Demonstrate how employees can improve environmental performance
