

## Safety, Health and Environment for Construction Workers

### Course Aim

This course provides the core knowledge your workers need to stay safe and embeds the good understanding and techniques needed to keep others safe too. Keeping your business healthy and safe with an effective training programme will enable you to reduce the cost of accidents and illness by up to 40 per cent.

### Who Should Attend?

This course is for anyone who works on or around a construction site or has cause to visit the site in the course of their work.

CSCS approval means that the course will equip delegates with the knowledge and skills required to be eligible to apply for the Green Labourer card - allowing them to work on construction sites in entry-level positions.

### Course Duration

This is a 1-day course.

### Maximum Delegates

The maximum number of delegates is [12].

### Certification

Delegates successfully completing the course will be issued with IOSH accredited certification.

### Agenda

- Health and safety issues to be managed in the construction industry to protect employees, contractors, neighbours and others
- The basics of local law
- The importance of risk assessments and method statements and the development process
- Site requirements for the welfare of construction workers on site
- Hazards and controls associated with construction sites and activities including working at height and confined spaces
- Site environmental management including management of waste and ecology
