

C&G 6160-07 - Direct Emergency Rescue and Recovery of Casualties from Confined Spaces

Course Aim

The aim of this course is to reflect the national occupational standard for directing emergency rescue and recovery of casualties from confined spaces. This course covers both water and non-water industry areas. This may include working with potable water, sewage treatment processes, drain and sewer cleaning operations, or where the operative is working in or near water, or where a confined space is subject to surface water flooding.

And for the non-water this may include pharmaceutical, petrochemical, asbestos removal, vehicle manufacture and servicing, aeronautical, construction, communications, power, utilities, gas, electrical and mechanical engineering, and some elements of work operations in mines, quarries, and tunnelling.

Please be aware that the safe working load (SWL) of equipment used during the practical session of this course is **136KG**.

If a delegate who wishes to attend is above this weight, please contact us on **0345 766 7799** to check if additional provisions can be made for your chosen course.

Who Should Attend?

This course is anyone who directs the activities of a team for rescue or recovery in confined spaces. This may include rescue team leader, coordinator, entry controller/top person or supervisor in relation to rescue and recovery of casualties, planning and preparing for emergency operations, mobilising rescue teams, directing and monitoring rescue activities, reporting and securing sites after incidents or emergencies.

Agenda

- Plan and prepare emergency operations for a rescue team
- Mobilise a rescue team and direct entry and exit to the confined space
- Monitor a rescue team to ensure procedures are followed
- Understand rescue team leader duties and responsibilities
- Understand the principles of working as a rescue team leader

Certification

Delegates will on successful completion of the course receive City & Guilds in Direct Emergency Rescue and Recovery of Casualties (6160-07)

Course Duration

This is a 1-day course
