

NEBOSH National Certificate in Construction Health & Safety (E-Learning)

Course Aim

To provide delegates with a comprehensive understanding of how to identify and manage workplace hazards in the construction industry.

The qualification covers the core health and safety issues involved in construction - many operatives undertake this course as a platform to build upon their skills and knowledge and advance in a career in construction health and safety.

Who Should Attend?

The NEBOSH National Certificate in Construction Health and Safety is designed for managers, supervisors and coordinators who work in the construction industry, including those who manage contractor activities or work in an environment that requires temporary workplaces.

E-learning modules are ideal for those individuals who do not want time away from their job / workplace.

Certification

Delegates are assessed with two written and one practical examination and need to pass all three units within a five-year period. A unit certificate is issued denoting successful achievement of each unit. A certificate award parchment is issued on successful completion of all three units.
