

Fundamentals in Fire Detection & Alarm Systems in Domestic Buildings - BS 5839-6

Course Aim

The aim of this 1-day course is to provide delegates with detailed recommendations for Fire Detection & Alarm Systems in all domestic premises, addressing both new-build and existing properties.

Who Should Attend?

This course is essential for individuals working in Fire Detection & Alarm Systems in domestic premises. The course is intended for architects and other building professionals, enforcing authorities, installers, and others responsible for implementing fire precautions in domestic premises.

Course Duration

This is a 1 day course.

Maximum Delegates

Maximum attendees: 14 delegates.

Certification

Upon completion of the Fundamentals in Fire Detection & Alarm Systems in Domestic Buildings course, delegates will receive an instant result. Delegates who have successfully completed the course will receive a Firequal certificate in due course.

If you require a Certificate of Attendance in the interim, please don't hesitate to contact us on 0345 605 0006.

Agenda

Delegates will be taken through the requirements of BS 5839-6 to provide an understanding of the following:

- The scope of BS 5839-6 and the premises covered
- The balance between fire risk, system reliability and its success rate
- The different grades and categories of system available
- A guide to the minimum grade and categories of system for typical premises
- The location of detectors & manual call points specific to domestic premises
- The requirement for the limitation of false alarms
- The audibility requirements for domestic premises
- The requirements for installation, commissioning & certification
