

## Safe Use of Petrol Driven Cut-Off Saws

### **Course Aim**

This course is designed to provide the necessary skills and knowledge required to safely operate a petrol driven cut-off saw in line with manufacturer's guidance and current legislation.

Accidents associated with the use of this equipment are becoming more common and this course aims to raise industry standards and minimise future injuries.

### **Who Should Attend?**

This course is essential for personnel who are required to operate petrol driven cut-off saws in the course of their daily work.

### **Course Duration**

This is a 6 hour course.

*Please note, this course is a mixture of theoretical and practical delivered on-site at customer premises only.*

### **Certification**

Delegates successfully completing the course will be issued with a Certification by C&G after 28 days, which is valid for 3 years.

### **Requirements**

In order to attend this training course good written and spoken English is required.
