

# IOSH - Working Safely (Remote Learning)

## Course Aim

This course will provide delegates with the knowledge required to ensure employees within an organisation understand their health and safety responsibilities in the workplace.

This remote learning and examination option for the [IOSH Working Safely](#) course has been created to allow delegates to gain and develop the required knowledge outside of the classroom.

## Who Should Attend?

Delegates within an organisation looking to enhance their awareness of working safely responsibilities. Working Safely is for people at any level, in any sector, needing a knowledge of the essentials of health and safety.

This course will be delivered via video conferencing using Microsoft Teams Virtual Classroom. This allows two-way communication, ensuring the course is interactive with delegates having the opportunity to ask questions. Each delegate in attendance must have a webcam and microphone, to provide evidence of identity and the ability to answer all examination questions.

## Certification

Delegates successfully completing the course will receive an IOSH Working Safely certificate.

The trainer will conduct an online exam with all delegates via video communication on Microsoft Teams and the delegate must be visible via the video at all times.

## Agenda

The training and examination for this course will be delivered remotely via Microsoft Teams, but will follow the same curriculum as the classroom [IOSH Working Safely](#) course and the same standard of training will be delivered, meeting all Scheme Rules.

- The Law and Your Responsibilities
  - » Understanding the moral, legal and financial reasons for working safely
- Hazards and Risks
  - » Understanding what is meant by the terms 'hazard' and 'risk' and how to identify common hazards faced in the workplace
