

Environmental Sustainability Skills for Managers (ISEP)

Course Aim

The aim of this course is to provide the knowledge and understanding of the strategic and operational overview of environmental sustainability as it affects their specific industry and work area. This course is invaluable in giving managers at all levels the confidence to get involved in and fully engage in your organisation's environmental sustainability challenges.

Topics covered include:

- The understanding of the strategic opportunities and constraints that environmental sustainability presents organisations.
- The importance of resource efficiency; the impact of environmental sustainability across the value chain.
- The impacts of pollution, prevention, control and environmental legislation in organisations.
- How employees support environmental sustainability.

Who Should Attend?

This course is aimed at delegates who are in management/supervisor roles across all sectors and has no formal entry requirements. It is best suited for those delegates who are looking to develop their confidence to get involved in and fully engage in your organisation's environmental sustainability challenges.

Agenda

- Understand the main environmental and economic risks and opportunities
- Understand compliance obligations and business drivers for change
- Understand the main potential impacts on environment and sustainability
- Understand how to improve environmental performance
- How to evaluate drivers for change and barriers
- Understand baseline data to monitor and improve performance
- How to apply knowledge of environmental sustainability across the value chain
- How to demonstrate the importance of implementing resource efficiency
- How to demonstrate how employees can improve environmental performance

Certification

Delegates successfully completing the course will receive an ISEP issued certificate.

Course Duration

This is a 2 day course.
