

Eye Protection - E-Learning

Course Aim

Upon successful completion of this course, delegates should be able to know how to identify hazards and keep themselves and others safe at work, recognise the different kinds of eye protection equipment and understand how they protect the eyes. The course also aims to provide an understanding of first aid advice for when accidents involving eyes happen and how to prevent long term damage.

Available in over 35 languages

Our courses are machine translated* into a variety of popular International languages, so regardless of location or language preference, we've got you covered. Our machine translated content includes the translation of course transcripts and test questions.

**Content which is not English may be machine translated and is for assistive purposes only. We cannot guarantee the accuracy of translations.*

Who Should Attend?

This e-learning course is for delegates who require information in how to identify hazards and the risk they pose to their eyes, understand how to use the correct Personal Protective Equipment (PPE), first-aid advice, and how to manage risks.

Course Duration

This is a 30 minute course.

Agenda

The course modules cover:

- Risks and Hazards
- Protecting Yourself
- Accidents Happen
- Identifying Risk and Managing Safety

Certification

Delegates will receive a HSS printable certificate in Eye Protection upon completion of the course.

This course is approved and accredited by IOSH.
