

Groundworker Water Regulations

Course Aim

This course aims to give delegates the knowledge and skills to gain Approved Contractor Status, allowing them to self-certify the installation of new water supply pipes in compliance with water regulations and byelaws. By achieving this status, delegates reduce the need for water company inspections, streamlining their operations and increasing professional credibility. Approved contractors are subject to regular audits to ensure continued compliance and high standards.

Who Should Attend?

This course is designed for delegates who are regularly involved in the installation of water supply pipework, from stop tap to stop tap. It is ideal for professionals seeking to enhance their competency, ensure regulatory compliance, and work safely and efficiently within the scope of water services installation.

Course Duration

This is a 1 day course.

Maximum Delegates

Maximum attendees: 15 delegates.

Agenda

- Identify, interpret and comply with water regulations
- Identify non-compliances
- Have sufficient knowledge to pass the Groundworker
- Water regulations assessment
- If successful, apply to become an approved member of a recognised scheme (i.e., Approved Contractor)
- The Water Supply (Water Fittings) Regulations/byelaws set out the installation requirements for plumbing systems
- The Water Supply (Water Fittings) Regulations 1999
- The Water Supply (Water Fittings) Regulations (Northern Ireland)
- The Water Supply (Water Fittings) (Scotland) Byelaws 2014

Certification

Delegates will be assessed through a multiple-choice examination conducted at the end of the training session. Upon successful completion, delegates will be awarded a City & Guilds Accredited Programme Certificate. This certification is valid for three years, after which renewal will be required to maintain accredited status and ensure continued compliance with industry standards.
