## CPCS - A02 Crawler Crane - Novice

### Certification

This course will give delegates a CPCS Red Trained Operator card (on successful completion of CPCS technical tests).

#### Trained Operator Card (RED)

The Trained Operator Card confirms a level of core skills, knowledge, and understanding that can be applied in the workplace until measured as competent against national standards. Experienced and capable operators may hold a Trained Operator Card while working towards an SVQ or NVQ.

If you hold or have held a previous CPCS card and wish to progress, please let us know before booking.

Once you've obtained your Red CPCS Trained Operator Card, it is valid for 2 years. During this time, you are expected to complete an NVQ in Plant Operations to progress to a Blue CPCS Competence Card.

If you have not completed your NVQ within the 2-year period, the accreditation body, NOCN-CPCS, may allow a grace period provided you are registered and booked onto an NVQ course. For further guidance on eligibility and next steps, please contact our team.

#### Competent Operator Card (BLUE)

The Competent Operator Card confirms that the holder has demonstrated health and safety awareness (via the CITB Health, Safety, and Environment test), underpinning knowledge (via a CPCS theory test), operating ability (via a CPCS practical test), and operating competence on the type of plant (evidenced by an SVQ, NVQ, or employer confirmation of competence).
